

Higher standards in...
critical glass processing.

**Glass Equipment for the
Photovoltaic Industry.**

Critical glass processing equipment for the photovoltaic industry.

Extensive Experience

For more than 60 years, Billco Manufacturing has been a leading equipment supplier to the glass industry. For more than 20 years, Billco has been utilizing that experience to deliver quality glass-washing equipment to the solar industry.

Advanced Capabilities

Each project is uniquely handled by a talented group of engineers and sales professionals. Unique solutions are designed for each customer to optimize productivity and efficiency.

Equipment Solutions

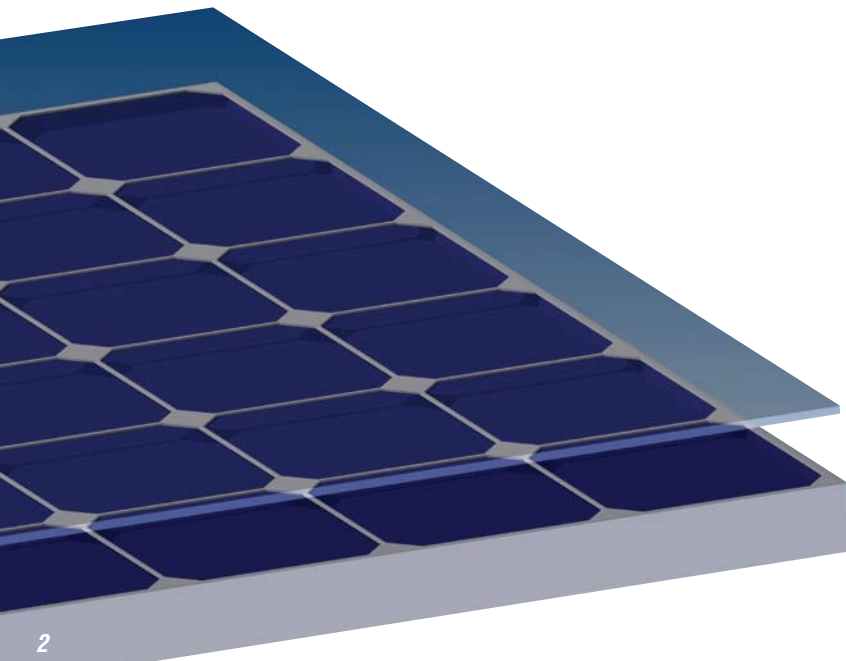

An array of equipment is available to companies that are seeking to expand their glass processing capabilities. Equipment includes washing, cutting, insulating, PVB laminating, handling and software.

Quality Service

Each machine is warranted with 24/7/365 service and parts support. Experienced service technicians are on-call to provide assistance by phone or on-site.

Worldwide

A capable team of US-based and international sales associates are available to serve the global market. Equipment design is configurable to meet individual country-specific terms and support is offered 24/7/365.

GLASS EQUIPMENT:

- ✦ Washing
- ✦ Cutting
- ✦ Laminating (PVB)
- ✦ Insulating
- ✦ Handling
- ✦ Software

WASHING EQUIPMENT:

Billco Manufacturing has been a worldwide leader in advanced cleaning technology for more than 60 years. Unique features make Billco's washers an optimal solution for most glass processing needs:

Processing Capabilities — A wide selection of washers is available to suit an array of processing needs, from critical to high-speed cleaning.

Maintenance-Saving — Every machine has unique integrated features that are designed to minimize maintenance and optimize production.

Custom Solutions — A group of talented engineers are available to custom engineer equipment to meet unique processing demands.

Optional Features — Each washer has a set of optional features that permit customers to custom configure the equipment to meet individual cleaning needs without paying a custom price.

Flexibility — Modular and configurable sections enable simplified equipment changes. As processing needs change, the equipment can be easily reconfigured, saving time and money.

Cleaning Applications — A range of washers is available to meet the demands of many glass cleaning applications, from photovoltaic to automotive to fenestration industries.
