Versa Clean Series

Glass Washer

A uniquely engineered, low-maintenance, versatile design that will accommodate most cleaning applications in the small- to mid-range part sizes.

Series	Conveyor Widths	Minimum Glass Size	Glass Thickness Range	Standard Operating Speed
VC 20	20½"	4"-6"	0.039"-0.250" without adjustment	Up to 50 ft./min.
VC 24	24½"	4"-6"		
VC 30	30½"	4"-6"		
VC 36	36½"	6"	0.039"-0.375" with adjustment	
VC 40	40½"	6"	0.039"-0.375" with adjustment	

Versatile Processing Capability — engineered to simultaneously process both small- and mid-range part sizes

Flexible Design — adapts to unique cleaning requirements

Quick-Maintenance Design — provides for quick and easy part cleaning or replacement

Modular Construction — interchangeable zones provide flexibility for custom arrangements or simplified future modifications

Standard 4-Corner Lift System — ensures easy access for maintenance

Patented Quick-Release Bearing Design — reduces bearing replacement and roll removal time

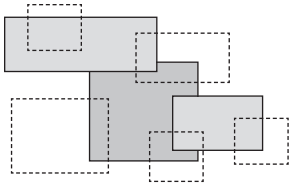

Included safety features not shown.
Optional blower platform shown.
